

RT² Profiler PCR Array (96-Well Format and 384-Well [4 x 96] Format)

Human MYC Targets

Cat. no. 330231 PAHS-177ZA

For pathway expression analysis

Format	For use with the following real-time cyclers
RT ² Profiler PCR Array, Format A	Applied Biosystems® models 5700, 7000, 7300, 7500, 7700, 7900HT, ViiA™ 7 (96-well block); Bio-Rad® models iCycler®, iQ™ 5, MyiQ™, MyiQ2; Bio-Rad/MJ Research Chromo4™; Eppendorf® Mastercycler® ep realplex models 2, 2s, 4, 4s; Stratagene® models Mx3005P®, Mx3000P®; Takara TP-800
RT ² Profiler PCR Array, Format C	Applied Biosystems models 7500 (Fast block), 7900HT (Fast block), StepOnePlus™, ViiA 7 (Fast block)
RT ² Profiler PCR Array, Format D	Bio-Rad CFX96™; Bio-Rad/MJ Research models DNA Engine Opticon®, DNA Engine Opticon 2; Stratagene Mx4000®
RT ² Profiler PCR Array, Format E	Applied Biosystems models 7900HT (384-well block), ViiA 7 (384-well block); Bio-Rad CFX384™
RT ² Profiler PCR Array, Format F	Roche® LightCycler® 480 (96-well block)
RT ² Profiler PCR Array, Format G	Roche LightCycler 480 (384-well block)
RT ² Profiler PCR Array, Format H	Fluidigm® BioMark™

Sample & Assay Technologies

Description

The Human MYC Targets RT² Profiler PCR Array profiles the expression of 84 key cancer-related genes controlled by a major oncogenic transcription factor. MYC contains a basic helix-loop-helix DNA-binding domain and a leucine zipper domain for dimerization with its partner MAX, another basic helix-loop-helix transcription factor. The heterodimer binds enhancer box sequences (E-boxes) in promoters and recruits histone acetyltransferases to mostly upregulate the expression of as many as 15% of the genes in the mammalian genome. MYC signaling is primarily responsible for promoting cell growth and proliferation, and its overexpression drives the formation of what is estimated to be 20% of all human cancers, causing about 100,000 US cancer deaths per year. Therefore, disruption of MYC function has recently been identified as an important target for anti-cancer drug development. Analyzing the expression of MYC-responsive genes can help researchers to better understand its normal functions, its role in oncogenesis, and the mechanism of action of anti-MYC agents at the molecular level. Most of the targets of MYC included on this array have been discovered using genome-wide analysis of both gene expression and MYC promoter binding sites via chromatin immunoprecipitation in various cancer cell lines either normally or artificially over-expressing MYC. These MYC targets regulate essential processes such as apoptosis; cell cycle; cell growth, proliferation, and differentiation; DNA repair; epigenetics; metabolism; protein synthesis, degradation and turnover; RNA processing; and signal transduction. MYC, MAX, and other related transcription factors are also represented by the array. A set of controls present on each array enables data analysis using the $\Delta\Delta CT$ method of relative quantification and assessment of reverse transcription performance, genomic DNA contamination, and PCR performance. Using real-time PCR, research studies can easily and reliably analyze the expression of a focused panel of genes responsive to MYC with this array.

For further details, consult the *RT² Profiler PCR Array Handbook*.

Shipping and storage

RT² Profiler PCR Arrays in formats A, C, D, E, F, and G are shipped at ambient temperature, on dry ice, or blue ice packs depending on destination and accompanying products. RT² Profiler PCR Arrays in format H are shipped on dry ice or blue ice packs.

For long term storage, keep plates at -20°C.

Note: Ensure that you have the correct RT² Profiler PCR Array format for your real-time cycler (see table above).

Note: Open the package and store the products appropriately immediately on receipt.

Array layout (96-well)

For 384-well 4 x 96 PCR arrays, genes are present in a staggered format. Refer to the RT² Profiler PCR Array Handbook for layout.

Related products

For optimal performance, RT² Profiler PCR Arrays should be used together with the RT² First Strand Kit for cDNA synthesis and RT2 SYBR® Green qPCR Mastermixes for PCR.

Product	Contents	Cat. no.
RT ² First Strand Kit (12)	Enzymes and reagents for cDNA synthesis	330401
RT ² SYBR Green qPCR Mastermix (2)*	For 2 x 96 assays in 96-well plates; suitable for use with real-time cyclers that do not require a reference dye, including: Bio-Rad models CFX96, CFX384, DNA Engine Opticon 2; Bio-Rad/MJ Research Chromo4; Roche LightCycler 480 (96-well and 384-well); all other cyclers	330500
RT ² SYBR Green ROX™ qPCR Mastermix (2)*	For 2 x 96 assays in 96-well plates; suitable for use with the following real-time cyclers: Applied Biosystems models 5700, 7000, 7300, 7500 [Standard and FAST], 7700, 7900HT 96-well block [Standard and FAST] and 384-well block, StepOnePlus; Eppendorf Mastercycler ep realplex models 2, 2S, 4, 4S; Stratagene models Mx3000P, Mx3005P, Mx4000; Takara TP-800	330520
RT ² SYBR Green Fluor qPCR Mastermix (2)*	For 2 x 96 assays in 96-well plates; suitable for use with the following real-time cyclers: Bio-Rad models iCycler, iQ5, MyiQ, MyiQ2	330510
